## 6" LED Module/Trim Component

### DESCRIPTION

The 8572 is a 6" LED Eyeball module/trim that is an ideal solution when paired with the 8116HIC for affordability, safety, and efficiency in any new construction project requiring an IC rating.

### DESIGN FEATURES

#### Construction

- Spun aluminum reflector with plastic trim ring
- 359° of rotation w/ 30° of vertical adjustment
- Robust extruded aluminum heatsink

#### Electrical

- Universal voltage: 120-277V
- Triac dimmable with 8116HIC driver
- 50,000 hour projected life
- 15W | 950Lm
- 23W | 1,500Lm
- Available in 3000 or 4000K CCT
- Suitable for use in wet locations

#### Installation

- Easy installation with torsion springs and a plug-in quick connect for the 8116HIC

#### Lens

- Textured clear glass lens

#### Finish

- Available in white or black finish

#### Certifications

- cETLus
- 5 year limited warranty

#### Compatibility

- 8572 requires the 8116HIC for operation and is not compatible with any other housing.
